

NEPED

Capability Statement

Nagaland Empowerment of People through Economic Development · Government of Nagaland · Established 1995

1995	8M+	108+	17,930 ha	30 yrs
Established	Trees planted	Hydrogers installed	Watershed land treated	Continuous delivery

WHO WE ARE

An autonomous government organisation delivering community-led development across Nagaland

NEPED is an autonomous, government-registered organisation formed by the Government of Nagaland in 1995. It is run by a Project Operations Unit (POU) — a multi-disciplinary team of officers drawn from across state government departments — headed by a senior Secretary-level Team Leader and advised by a Project Steering Committee under the Chief Secretary.

NEPED delivered the first foreign-funded project ever undertaken in Nagaland (ICEF/CIDA, 1995). Since then, it has implemented programmes across environment protection, livelihoods, agro-forestry, watershed management, biodiversity conservation, renewable energy and climate resilience. It works alongside village councils, tribal communities and farmers in every district of the state. In December 2025, the Government of Nagaland engaged NEPED, through CERES, as state technical partner for research and innovation.

WHAT WE DELIVER

Four areas of proven capability

Livelihoods & Enterprise

Agro-forestry on jhum land, cash-crop introduction, micro-credit, women's SHGs, piggery, handicraft marketing and value-addition. Three phases of delivery across more than 1,000 villages, all 16 tribes.

Land, Water & Biodiversity

Watershed restoration, soil-erosion control, Community Conserved Areas, biodiversity registers and forest connectivity. 17,930 ha treated. Currently active under KfW-funded NEPED-IV across 35 villages.

Renewable Energy

'Made in Nagaland' Hydrogers (3 kW pico-hydro), designed and manufactured at CERES, Dimapur. 108+ units installed, most in Indo-Myanmar border villages. IIT Roorkee certified. Adopted across four states.

CERES—R&D & Manufacturing

Centre of Excellence for Renewable Energy Studies, Dimapur. Local manufacturing of ~20 renewable-energy products. State technical R&D partner covering 225 villages in 16 districts. Partnership with Nagaland Tool Room. Training hub for rural engineers and entrepreneurs.

HOW WE WORK

Community-owned from day one

Every NEPED programme follows the same model. The village council identifies the need and commits governance, labour and land. NEPED provides technical knowledge, training, technology and the connection to funding. Communities own and sustain the outcome by collecting revenue, maintaining infrastructure, and training the next generation of local engineers and farmers. The result is a 1:6 replication ratio in agro-forestry (six farmer-led plots for every NEPED test plot), and Hydroger villages that self-fund upgrades a decade after installation.

TRACK RECORD

Funded projects delivered

PROJECT	PERIOD	FUNDER
NEPED-I — Tree planting on jhum land	1995–2000	ICEF / CIDA (Canada)
NEPED-II — Cash crops & micro-finance	2001–2006	ICEF / CIDA (Canada)
NEPED-III (WDPSCA) — Watershed development	2006–2012	Ministry of Agriculture, GoI
NEPED-SCEN — Community Conserved Areas	2007–2010	Sir Dorabji Tata Trust (SDTT)
Community-based piggery	2012–2016	Navajbhai Ratan Tata Trust (NRTT)
Pico Hydroger/Watermill installation (30 nos)	2015–2016	The Ministry of New and Renewable Energy (MNRE), GoI
Development of Hydroger	2017-2019	NEC
NAFCC — Climate adaptation	2018–2026	Ministry of Agriculture, GoI
Supplied 155 Hydrogers and 16 ram pumps to Meghalaya	2019-2024	Meghalaya Basin Development Authority (MBDA)
NEPED-IV / FBMP — Forest & biodiversity (35 villages)	2019–present	Federal Republic of Germany via KfW

INDEPENDENT RECOGNITION

> *"NEPED's potential for mapping, conserving, developing and exploiting the enormous bio-diversity of the Northeast marks it out as a critical lead programme."*
>
> — Shukla Commission Report, Government of India, March 1997

PARTNERSHIP OPPORTUNITIES

Where your support makes the biggest difference

Scale community energy

Hundreds of unelectrified villages remain across Nagaland's border regions. The technology and the ownership model are both proven. Fund installations and the community-engagement process that makes each one sustainable. Scale-up path: 10–100 kW mini-hydro.

Deepen climate resilience

Built on three decades of agro-forestry, watershed management and community conservation. Expand CCAs to new districts, connect conservation with eco-tourism revenue, and strengthen community-based monitoring and M&E systems.

Grow CERES regionally

Develop CERES into a regional centre of excellence. Train rural engineers and renewable-energy entrepreneurs from across the Notheast. Collaborative R&D with research institutions. Product certification pipeline.

GOVERNANCE

Structure: Autonomous government-registered organisation; POU of multi-disciplinary officers; Project Steering Committee headed by the Chief Secretary.

Team Leader: Shri Kovi Meyase (NCS), 2025–present. Senior Secretary- level bureaucrat, as mandated.

Fiduciary history: 30 years of managing bilateral (CIDA), multilateral (KfW, World Bank-assisted ELEMENT), central government (GoI) and trust (Tata) funding. Total value delivered exceeds ₹40 crore (approx. USD 16M cumulative). State Plan support continues, with dedicated allocations for NEPED and Hydroger in the 2026–27 State Budget.

Technology partner: NagaEd (digital systems, communications, website).

Partner with NEPED

Office: NEPED Secretariat, Capital Convention Centre, near Nagaland Civil Secretariat, Post Box - 231, Kohima-797001, Nagaland.
